

What I want to learn or understand better: I want to finish the course well by reflecting on the most crucial parts of our experience in the final report. To do this I want to learn more about scrum again and read what others have done as well as reflect on my own and discuss together with the team.

How I can help someone else, or the entire team, to learn something new: Just like last week I can help the team to come up with better ideas by sharing my own and giving input on theirs. The coming weeks more focus and time will be placed on this.

What my contribution is towards the team's use of Scrum: We have not felt that we should change anything and especially when it is the last sprint that does not feel very valuable. So I have not contributed with anything new this week except that conclusion.

What my contribution is towards the team's deliveries: I have contributed with notes to the final report and read articles on especially testing which has been our weakness during the project, to know what we could have done differently, as well as prepared parts of the presentation.
