Individual reflection Lv2

What do I want to learn or understand better?
- Right now, I have no previous experience of working with user stories or starting up a project.
- I would like to learn the startup process, the definition of the user-stories and how they will be translated into relevant tasks which we will work towards. I am especially interested in how we will set up the programing environment which is something I want to learn more about.
- To get there I will try to be as involved as possible in the set-up process and try to learn from my team members.

how can I help someone else, or the entire team, to learn something new?
- I believe my knowledge in coding and programming is not as good as my team members. However, I believe I have better knowledge in how to structure things and how we can have a good workflow with the stakeholder in focus.
- I can help the team by engaging in the discussion and try to contribute to new ideas of design and function of the product, while at the same time listen to other ideas and thoughts.
- To get there I will try to be as engaged as possible during the meetings.

what is my contribution towards the team's use of Scrum?
- Now, it's more of a learning process for me since my experience is insufficient in the coding aspect. Thou I believe I know what we can improve in the aspect of workflow.
- My contribution to the use of scrum will be to make sure we as a group follow concept and have good communication between the group members. Here I can contribute by engaging in discussions and try to do my part when completing tasks.

what is my contribution towards the team's deliveries?
- Since have much work to do in our other course, the bachelor's essay, I will have to prioritize this now in the beginning of the course. My contribution will therefore be more aimed towards giving my thoughts and opinions on how we will continue with our work this week. It is easter and we are doing good progress so far.
- I would like to contribute more on the code.
- This will be done by learning syntax and teaming up with others
